BRADFORD NETWORKS
the smart edge

Administration and Operations Custom Training

Bradford Networks' premier on-site training is the most productive and cost-effective way to prepare your staff to administer and operate Network Sentry. Offered at your facility, the training provides an expert Bradford Networks trainer and the necessary workstations for a 2-day hands-on class. It is tailored for network and security administrators, network managers, and other IT staff who will utilize Network Sentry.

Bradford Networks' Administration and Operations Custom Training deliverables include:

• Two days of hands-on training applying best practices
• Network Sentry administrator certification
• On-site classroom environment
• On-demand course pre-requisites
• Training package with class materials

Two Days of On-site Training: There is no better way to learn than by doing. The class consists of structured, sequential hands-on labs. Each successive lab builds on your knowledge, thereby ensuring you are learning key concepts and procedures in the right order. Sufficient time is afforded for each lab's successful completion. Sessions include:

– Bring your own device (BYOD)
– Guest Management
– Friend verses foe (network lockdown)
– Network visibility (who, what, when, where)
– Device profiling
– Endpoint compliance
– Network access roles (user and device network access provisioning)
– Third-party integrations
– Notification and alerting
– Analytics
– General administration

Certification: Following successful completion of the course, each attendee will be certified as a Network Sentry Administrator.

On-site Classroom: Provided within the classroom are training stations for all attendees, on-site time with the instructor, answers to all questions and the opportunity to listen and interact with co-workers. Included in the training stations are the appliances, classroom network (wired & wireless) and authentication services needed for the 2 days of on-site training.

ON-SITE TRAINING CHECKLIST

1. Two Days of On-site Training
» Avoid travel expenses
» Hands-on training allows for "learning by doing"
» Maximize ROI

2. Certification
» Attendees become Certified Network Sentry Administrators

3. On-site Classroom
» Conveniently held at your facility
» Training is conducted by a Bradford Networks' training expert
» On-site training stations are provided
» Sessions facilitate co-worker Interaction

4. Course Pre-requisites
» On-demand web-based training modules

5. Training Package
» Lecture guide
» Lab guide
» Hard and soft copies of all course materials

Course Pre-requisites: To ensure readiness for the hands-on class, on-demand web-based training modules provide an introduction to Network Sentry. Learn how to achieve network visibility of "What, Where, When and Who" is accessing the network and how to automate common operational scenarios to "Identify, Classify, Provision and Report" on users and devices. These on-demand modules provide the basis for effective Network Sentry administration:

1. What It Does
2. How It Works
3. Detailed Operational "How"

Training Package: This package includes both hard and soft copies of all the course materials to complete the class, including the lectures and lab guides which cover all the procedures and best practices.

CHALLENGES

» Enabling IT staff to keep up with the changing security landscape

» Network security complexity

» Balancing act between securing an "open" versus "closed" environment

» New tools causing production environment interruptions

» Travel and time outside the office to attend training

BENEFITS

» Accelerate ROI by learning how to exploit the power of Network Sentry

» Leverage the knowledge of Bradford Networks' training experts

» At your facility, no need to travel

» On-demand class preparation to fit your schedule

» Prepare IT staff to enhance network security

» Learn in a simulated production environment

» Foster valuable interaction among co-workers

DELIVERABLES

» Two days of hands-on, on-site training

» Certification as a Network Sentry Administrator

» On-site classroom

» Access to web-based, on-demand pre-requisite modules

» Comprehensive training package

Bradford Networks offers the best solution to enable secure network access for corporate issued and personal mobile devices. The company's flexible Bradford Networks platform is the first network security offering that can automatically identify and profile all devices and all users on a network, providing complete visibility and control. Unlike vendor-specific network security products, Bradford Networks provides a view across all brands of network equipment and connecting devices eliminating the network blind spots that can introduce risk.
