Administration and Operations Classroom Training

Bradford Networks' premier training is the most productive and cost-effective means to prepare your staff to operate and administer Network Sentry. Led by an expert Bradford Networks trainer, the 2-day hands-on training is offered at regional locations and is tailored for network and security administrators, network managers and other IT staff who will utilize Network Sentry.

Bradford Networks' Administration and Operations Classroom Training deliverables include:

- Two days of hands-on training applying best practices
- Network Sentry administrator certification
- Fully-equipped classroom environment
- On-demand course pre-requisites
- Training package with class materials

Two Days of Hands-on Labs: There is no better way to learn than by doing. The class consists of structured, sequential hands-on labs. Each successive lab builds on your knowledge, thereby ensuring you are learning key concepts and procedures in the right order. Sufficient time is afforded for each lab's successful completion. Sessions include:

- Bring your own device (BYOD)
- Guest Management
- Friend verses foe (network lockdown)
- Network visibility (who, what, when, where)
- Device profiling
- Endpoint compliance
- Network access roles (user and device network access provisioning)
- Third-party integrations
- Notification and alerting
- Analytics
- General administration

Certification: Following successful completion of the course, each attendee will be certified as a Network Sentry Administrator.

Classroom Environment: Each class is taught by a Bradford Networks' training expert at our training facility or regional location. Classrooms include lab resources for all attendees, dedicated time with the instructor and answers to all questions. Limited class size allows the opportunity to listen and interact with co-workers and other network professionals.

TRAINING CHECKLIST

1. Two Days of Labs
- » Hands-on training allows for "learning by doing"
- » Maximize ROI
- » Structured classroom setting

2. Certification
- » Attendees become Certified Network Sentry Administrators

3. Classroom Environment
- » Training is conducted by a Bradford Networks' training expert
- » Fully-equipped lab
- » Limited class size
- » Sessions facilitate co-worker Interaction

4. Course Pre-requisites
- » On-demand web-based training modules

5. Training Package
- » Lecture guide
- » Lab guide
- » Hard and soft copies of all course materials

Course Pre-requisites: To ensure readiness for the hands-on class, on-demand web-based training modules provide an introduction to Network Sentry. Learn how to achieve network visibility of "What, Where, When and Who" is accessing the network and how to automate common operational scenarios to "Identify, Classify, Provision and Report" on users and devices. These on-demand modules provide the basis for effective Network Sentry administration:

1. What It Does
2. How It Works
3. Detailed Operational "How"

Training Package: This package includes both hard and soft copies of all the course materials to complete the class, including the lectures and lab guides which cover all the procedures and best practices.

CHALLENGES

» Enabling IT staff to keep up with the changing security landscape

» Network security complexity

» Balancing act between securing an "open" versus "closed" environment

» New tools causing production environment interruptions

» Time to train staff in new skills

BENEFITS

» Accelerate ROI by learning how to exploit the power of Network Sentry

» Leverage the knowledge of Bradford Networks' training experts

» On-demand class preparation to fit your schedule

» Prepare IT staff to enhance network security

» Learn in a simulated production environment

» Foster valuable interaction among colleagues

DELIVERABLES

» Two days of hands-on training

» Certification as a Network Sentry Administrator

» Fully-equipped lab

» Access to web-based, on-demand pre-requisite modules

» Comprehensive training package

Bradford Networks offers the best solution to enable secure network access for corporate issued and personal mobile devices. The company's flexible Bradford Networks platform is the first network security offering that can automatically identify and profile all devices and all users on a network, providing complete visibility and control. Unlike vendor-specific network security products, Bradford Networks provides a view across all brands of network equipment and connecting devices eliminating the network blind spots that can introduce risk.
